

# Manipulative Activities

## Scarf throwing

Every child has a scarf and they are asked to scrunch it up small as a mouse cupped in their two hands

Then throw it up in the air and catch it with their:

- Hands
- Back
- Tummy
- Head
- Arm
- Foot

For this activity you can also ask individual children to name body part to catch on as this encourages them to think about their body parts but also gives them some leadership opportunities.

## Feathers

Use feathers and throw them up in the air and catch them. Again you can encourage children to throw them up and catch them on their different body parts.
